Examination Management System

Group 13

The **"Exam Management System"** is an extensive platform that automates the entire examination process-from scheduling and registration to result publication and certification. It accepts all aspects of exam scheduling; verifies student eligibility based on attendance and fees paid; assigns exam halls or online sessions along with invigilators; checks for secure requirements, etc. During examinations, it supervises the conduction and submission process; evaluates, grades, and compiles results possibly used for re-evaluation request purposes; publishes verified results on the student portal; automatically generates transcripts and certificates; and thereby updates student records. This system brings efficiency, accuracy, transparency, and fairness in the academic examination processes.

Activities

1.Exam Scheduling – Define exam dates, duration, and locations (or online setup).

2.Exam Registration

3.Attendance Check: Student must have ≥ 75% attendance.

*If attendance < 75% → registration rejected, notify student.
